Management Commentary

“2017 was an incredible year for Boingo as we delivered record results with an all-time revenue high of \$204.4 million, representing 28% growth over 2016,” commented David Hagan, Chief Executive Officer of Boingo Wireless. “Our strong performance exceeded the high-end of our guidance range and was fueled by growth in DAS, military and carrier offload. In addition, the fourth quarter of 2017 marked 13 consecutive quarters of double-digit revenue growth and ten consecutive quarters of year-over-year adjusted EBITDA margin expansion. We added 36 new venues to the Boingo network in 2017 and signed 43 Tier 1 carrier agreements. We have 84 DAS venues yet to be deployed, which is more than two times the amount of our 38 DAS venues that are live today. We were also pleased to have made additional traction with carrier offload by rolling out offload

Mr. Hagan continued, “Looking ahead, in addition to our key priorities of DAS, military and carrier offload, we are very focused on venue based, small cell deployments. We believe there is a massive addressable market and we expect small cells to deliver growth for many years to come.”

Use of Non-GAAP Financial Measures

To supplement Boingo Wireless’ financial statements presented on a GAAP basis, Boingo Wireless provides Adjusted EBITDA and free cash flow as supplemental measures of its performance.

The Company defines Adjusted EBITDA as net loss attributable to common stockholders plus depreciation and amortization of property and equipment, stock-based compensation expense, amortization of intangible assets, income tax (benefit) expense, interest and other expense, net, non-controlling interests, and excludes charges or gains that are nonrecurring, infrequent, or unusual. Boingo Wireless believes Adjusted EBITDA is useful to investors in evaluating its operating performance. Boingo’s management uses Adjusted EBITDA in conjunction with accounting principles generally accepted in the United States, or GAAP, and other operating performance measures as part of its overall assessment of the Company’s performance for planning purposes, including the preparation of its annual operating budget, to evaluate the effectiveness of its business strategies and to communicate with its board of directors concerning its financial performance. Adjusted EBITDA should not be considered as an alternative financial measure to net loss attributable to common stockholders, which is the most directly comparable financial measure calculated in accordance with GAAP, or any other measure of financial performance calculated in accordance with GAAP. Adjusted EBITDA for 2017 excludes settlement expense related to a claim from one of the Company’s venue partners and Adjusted EBITDA for 2016 excludes charges related to the Company’s contested proxy election for the 2016 annual meeting of stockholders because they represent non-recurring charges and are not indicative of the underlying performance of the Company’s business operations.

The Company defines free cash flow as net cash provided by operating activities, less purchases of property and equipment. Boingo Wireless believes that free cash flow provides investors with additional useful information to measure operating liquidity because it reflects the amount of cash generated by the Company’s operations after the purchases of property and equipment that can be used for strategic opportunities. Free cash flow should not be considered as an alternative financial measure to net cash provided by operating activities, which is the most directly comparable financial measure calculated in accordance with GAAP, or any other measure of financial performance calculated in accordance with GAAP.
